

**MORE TRACTION. MORE TREAD WEAR.**

Could the results get any more gripping?

**BDR-HG**

# THE BDR-HG. BUILT TO OUTLAST. DRIVEN TO OUTPERFORM.

Introducing the BDR-HG from Bandag. It's everything you'd expect from a high-grip drive tire. And quite frankly, a whole lot more. Uniquely engineered to deliver serious traction plus superb tread wear, real-world trials prove that the BDR-HG is Bandag's performance leader for regional and line-haul OTR tandem-axle applications. In fact, this product's name says it all: **Bandag Drive Regional-High Grip**. Count on it to carry you through some of the most challenging conditions out there. All while helping you get a grip on the rising cost of doing business.

## TRIED. TESTED. AND STILL ON TOP.

After thousands of miles of testing in a wide range of climates, the BDR-HG has come out a winner. This tire actually holds traction as the tread wears. That translates into more driver confidence. And that means more productivity and more profits at the end of the day. Talk to your Bandag dealer about putting the BDR-HG on your tractors today and get ready to start moving your business further ahead.

THE BDR-HG.  
DESIGNED FOR FLEETS WHO  
REFUSE TO COMPROMISE  
OUTSTANDING MILEAGE  
FOR OUTRIGHT MUSCLE.

COMPETITOR

The BDR-HG on the right has full-depth voids to retain the integrity of traction-producing lug design all the way to the tread wear pull point. In side-by-side comparison at 12/32" remaining tread, the competitive tire on the left looks like a rib tire, as voids begin to close up.

BDR-HG

# A RETREAD ONLY BANDAG COULD BUILD.

*Deep siping for strong late-life traction.*

*True open-shoulder design.*

*Full-depth voids for true lug design.*

*Computer-designed voids for enhanced traction.*

*Deep tread depth for long life.*

*Staggered tread blocks for even wear and low noise.*

Bandag's legendary R & D minds have done it again. Engineering a unique new tread pattern and compound that puts the BDR-HG miles ahead of the competition. This innovative tread pattern delivers best-in-class traction that continues throughout the tread life. And a long-wearing compound promises outstanding mileage. No wonder fleets from British Columbia to New Jersey are calling this one of our best ever.

Application-specific tire products from Bandag represent a major improvement in tire design and performance. By concentrating on specific real-world needs, we can build retreaded tires that deliver best-in-class performance at a fraction of the price of new tires. These application-specific tires are available only from your Bandag dealer. To find out which Bandag tire product best fits your needs, visit [bandag.com](http://bandag.com).

**No wasted time. No wasted money. No wasted effort. There's no room for detours in this business. Our industry-leading retreads and technologies create unmatched opportunities for your business to flourish.
