

BRSS™

On/Off Highway All-Position

An all-position on/off highway tread engineered to deliver long wear life on multiple surfaces

Long Wear • High Traction • On/Off Road

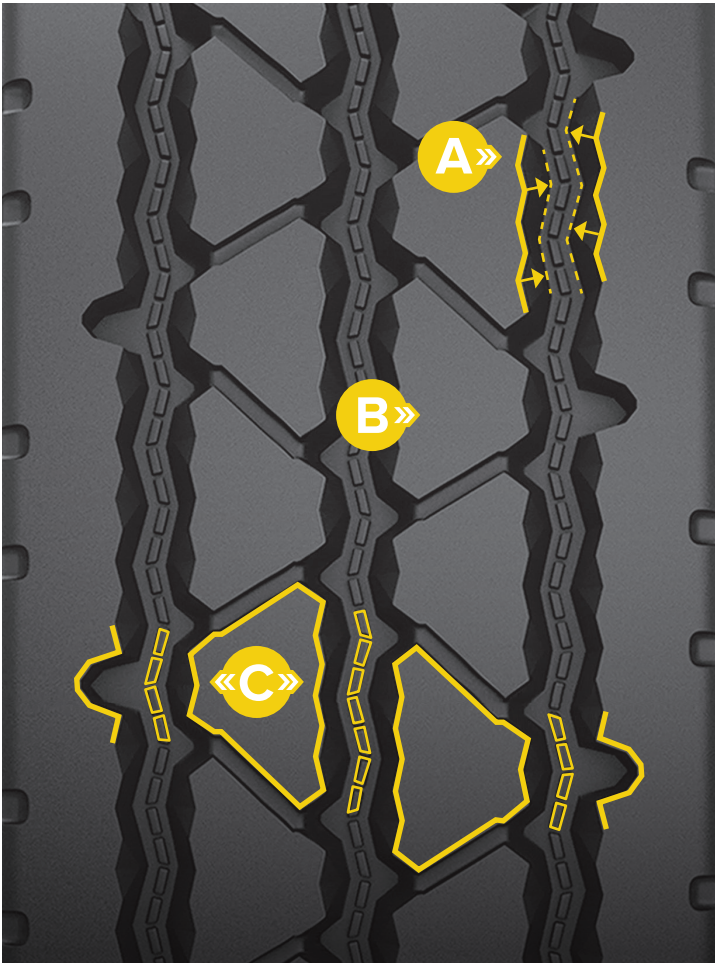

THE FEATURES RUN DEEP

The new Bandag BRSS all-position on/off highway tread is designed to extend wear life in regional haulers who also travel off-road as part of their work. The BRSS tread design is engineered to resist stone retention through optimized groove shapes to assist with extending the life of your casing. Bandag's specialized tread compound resists cutting and chipping which gives you piece of mind while driving in on and off-road environments.

BRSS™ Design Benefits

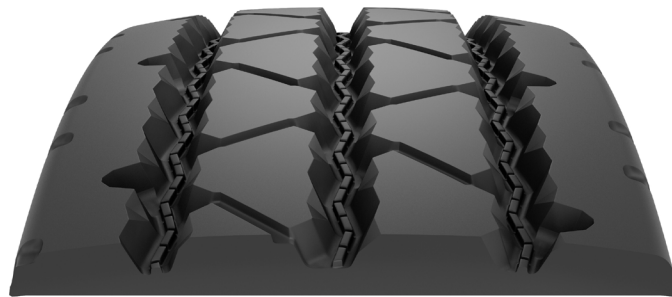

A Deep Tread
Provides more volume
for additional wear life

B Specialized Compound
Resists chipping and cutting

C Optimized Tread
Designed to discourage
stone retention

Extended wear life
for regional haulers who
travel on and off-road.

Build your fleet for better with Bandag. When you partner with Bandag, you'll get more miles out of less rubber. It's better for business, better for the environment and better for local economies.
