Introducing Bandag FuelTech® — an achievement in low rolling resistance retreads. Using advanced tread compounds and innovative tread design, FuelTech helps to deliver excellent performance, plus the eco-competitive benefits of retreading. The ultimate advantage? Combined with a Bridgestone Ecopia™ casing, FuelTech offers extraordinary fuel savings that can contribute to a lower total cost of ownership* over the entire life of your tires.

FuelTech is not just better for your budget, it’s better for the planet. By using state-of-the-art technology, Bandag produces quality retreads with just 30% of the energy used to make new tires.

**RETREADING IS RECYCLING**

Better for the Environment — It takes 22 gallons of oil to manufacture one new truck tire. It takes only 7 gallons of oil to produce a quality retread. In fact, according to the U.S. Environmental Protection Agency, retreading is responsible for saving North Americans more than 400 million gallons of oil every year. Plus, every tire retreaded is one less tire in our landfills.

*Based on rolling resistance and field mileage tests, Bridgestone Ecopia and Bandag FuelTech are our most fuel-efficient and lowest total cost of ownership tire and retread solution. Combining proprietary low rolling resistance technology with the industry’s most retreadable casing, Ecopia and FuelTech can help reduce fuel use and extend tire life for lower costs and greener returns, when compared to other Bridgestone tires.

**LOWER COSTS. GREENER RETURNS.**

---

**B710® FUELTECH**

Fuel-efficient retread designed for tandem-axle drive applications in long-haul and regional service.

- Advanced compounding reduces energy loss, lowering rolling resistance for optimum fuel efficiency
- Continuous shoulder design and High Rigidity Tread Pattern helps promote long, even wear
- Complements Bridgestone M710® Ecopia™ drive tire

**B835® FUELTECH**

Fuel-efficient wide base retread designed for tandem-axle drive applications in long-haul service.

- Advanced compounding reduces energy loss, lowering rolling resistance for optimum fuel efficiency
- Stone-rejector platforms help protect the belts from casing-damaging stones
- Continuous shoulder design and High Rigidity Tread Pattern helps promote long, even wear
- Complements Bridgestone Greatec M835™ Ecopia wide base drive tire

**B197® FUELTECH**

Fuel-efficient retread designed for single- and tandem-axle trailer and dolly applications in long-haul and regional service.

- Advanced compounding reduces energy loss, lowering rolling resistance for optimum fuel efficiency
- High Rigidity Tread Pattern helps promote long, even wear
- Thirsty cross-rib sipes help to deliver solid wet traction
- Complements Bridgestone R197™ Ecopia trailer tire

**B135® FUELTECH**

Fuel-efficient wide base retread designed for tandem-axle trailer applications in long-haul and regional service.

- Advanced compounding reduces energy loss, lowering rolling resistance for optimum fuel efficiency
- Stone-rejector platforms help protect the belts from casing-damaging stones
- High Rigidity Tread Pattern helps promote long, even wear
- Complements Bridgestone Greatec R135™ Ecopia wide base trailer tire
