

No frills. No compromises.

Introducing a new line of hardworking tread patterns from Bandag: DR 5.3™, DR 4.3™ and TR 4.1™

These drive and trailer retreads from the industry leader give you practical options for a variety of applications.

With tough compounds and robust tread designs, they help deliver longevity and long-term value without a premium price tag. Plus, they're backed by the largest dealer network in the industry.

DR 5.3 DRIVE RETREAD

A robust closed shoulder drive pattern for truckload, LTL and P&D applications.

- Aggressive lug pattern helps deliver strong traction
- Robust, solid shoulder for uniform wear and tread life
- Stone rejectors help prevent stone drilling
- Trusted, proprietary compound contributes to durability and wear life
- 22/32nds tread depth

DR 4.3 DRIVE RETREAD

Open shoulder drive pattern for a variety of demanding applications including truckload, LTL, P&D and mild on-/off-road applications in conditions requiring aggressive traction.

- Wide center rib for stability and even wear
- Open shoulder for good evacuation in adverse conditions and strong grip for chains
- Trusted, proprietary compound contributes to long, even wear and durability
- 22/32nds tread depth

TR 4.1 TRAILER RETREAD

A durable trailer pattern that delivers wear life and traction performance for truckload, LTL and P&D applications.

- Smooth, continuous shoulder promotes uniform wear
- Diagonal tread block edges help maintain traction on wet and dry surfaces
- Proven compound contributes to long wear life
- Circumferential grooves help evacuate water for strong traction in wet conditions
- 11/32nds tread depth

Maximize your casing returns with Bandag.

Bandag retreads deliver strong performance, real cost savings and an eco-friendlier way forward by recycling your valuable casing assets. For more information about Bandag retreads and to calculate estimated savings, **please visit bandag.com.**
