

BLSS™

Severe Service

A drive tread engineered to deliver long wear life and high traction in severe service applications

Long Wear • High Traction • On/Off Road

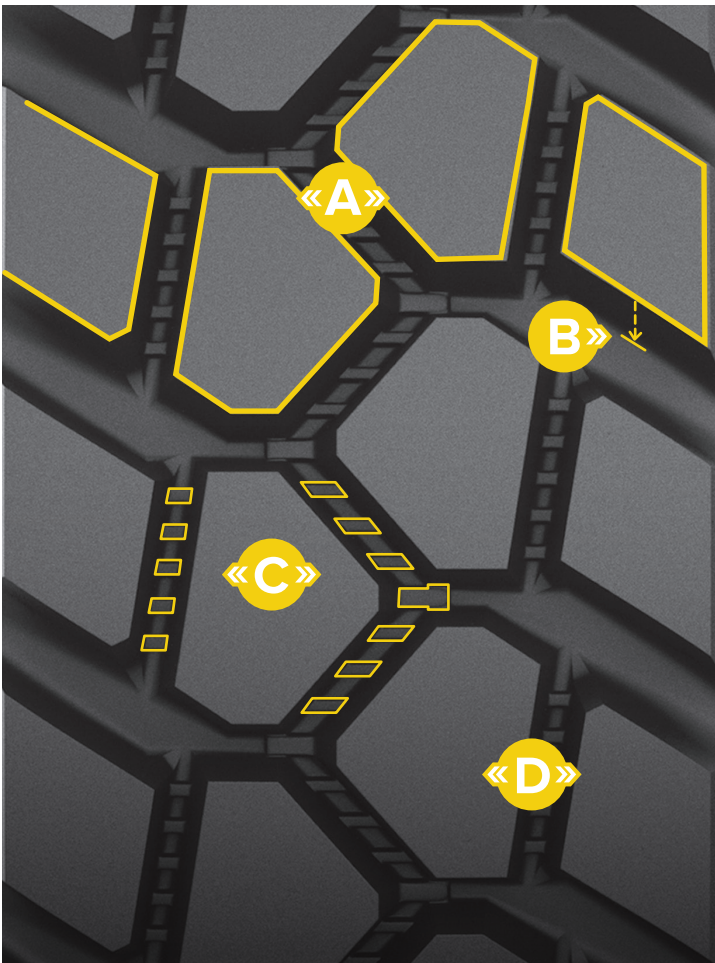

THE FEATURES RUN DEEP

The new Bandag BLSS drive on/off highway tread is designed to extend wear life for those who travel off-road as part of their work. The BLSS enlist Bridgestone's new stone rejection technology to resist stone retention. Bandag's specialized tread compound resist cutting and chipping which gives you piece of mind while driving in on and off-road environments.

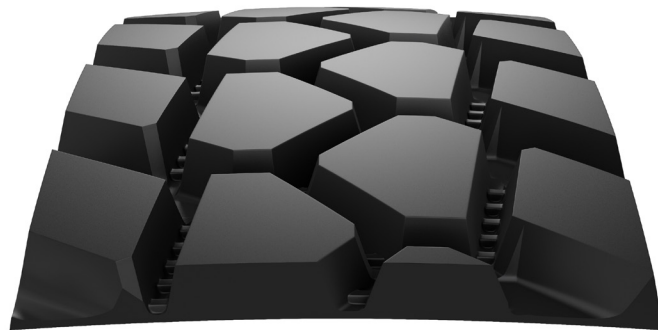

BLSS™ Design Benefits

- A Aggressive Tread Design**
Delivers powerful grip both on and off road
- B Deep 32/32" Tread**
Provides more volume for additional wear life
- C Stone Rejection Technology**
Discourages stone retention
- D Specialized Compound**
Resists chipping and cutting

Extended wear life
for those who
travel off-road.

Build your fleet for better with Bandag. When you partner with Bandag, you'll get more miles out of less rubber. It's better for business, better for the environment and better for local economies.
